

## O U R P R I D E – O U R S H A M E

Herceg Novi, one of the most beautiful towns in Adriatic, the town of writers and painters, slowly loses these titles. One of our town's symbol, the famous „Boka“ park was, for decades, a reason for many tourist to visit Herceg Novi to enjoy its beauty; today its completely deteriorated. This park, of which we all proudly spoke about, with palm trees rising above the town, with unique architecture that does not exist in any other town in this part of the Mediterranean, now is the palace that is avoided.

*The „Boka“ park, real botanical garden with over 80 different species of plants, beautiful fish pond, is located in the Center of Herceg Novi, built in 1908, today is completely deteriorated.*

„Its time we should take the matter in our own hands, it is time to heal suffering of planet Earth“

„Nothing can repay the damage, no one can return the lost time, this is the future we leave to our children!“

While walking around the park we stumble down the ruined stairs, broken trees and broken benches. Ruined *glycinia*, that used to make shade in the warmest summer days, just adds to the apocalyptic view of the park. In what used to be a beautiful fountain full with goldfish, today you can find garbage and broken glass.

„ . . . because for the Nature we are  
J U S T A D I S A P P O I N T M E N T ! “

We, young people have a desire to enjoy the beauties of this park just like previous generations. However, it is impossible to do that now, partly by our own fault. Destruction and poor environmental conscience of the citizens caused the today's state of the park. Now we are left with a question: Are we going to shamefully leave the Nature to cry for help, or we are going to take action!?
