

WHY BOTHER WHEN RIVER WILL TAKE IT ALL AWAY?

The picture shows the level of conscience of our citizens about the importance of nature protection. Some people don't bother to throw their garbage in containers, rather they throw it near their houses, in Ibar river.

Montenegro must not be ecological state only on paper, and for that, we, the citizens of Montenegro should protect its natural beauties from the waste that destroys it.

It is important to show this photo, so the citizens recognize that this is poor behavior that should immediately be stopped.
